Digital Art

Poems, Places & Soundscapes

Mon 7 – Fri 25 Apr
Cube gallery

An international exhibition of digitally-produced sound, poetry and film, focusing on place and soundscape. Mark Goodwin and Brian Lewis bring together a range of vivid, immersive sound-enhanced poetry made by poet-sound-artists, and collaborations between poets, musicians and sound designers.

Thu 10 Apr, 6.30pm

An informal panel discussion about sound and film-enhanced poetry will take place at Phoenix.

The exhibition is part of Mark Goodwin's Sound-Enhanced Poetry project, which was awarded an Arts Council England Grants for the Arts in 2013.

Getting Started with Arduino

Sat 5 Apr, 1pm – 5pm
Sat 14 Jun, 1pm – 5pm
Price: £45

Arduino is a microcontroller development board – a cheap little computer you can programme to read sensors and control things like motors and lights. It's a fantastic tool for artists, designers and hobbyists.

This workshop will get you up and running with this hugely adaptable technology, showing you how to program the device and make simple electronic circuits. The course fee includes a complete Arduino kit – yours to keep after the workshop.

Please bring a laptop to program on. A limited number of computers can be provided. Please let us know if you need us to supply one.
